

The consolidation of the media is killing our democracy. I am 51 years old and I have witnessed the change in the way news is presented. There is no longer any diversity of opinions, which is necessary for making informed decisions . I have given up trying to get my news on the corporate owned media, and like millions of others, now get my news on the internet. I will no longer support the corporate owned media. Please use your mandate to look out for the interests of the public.
